Swiss nationality

thomasmiller.ch

Internet enthousiast, I have been building websites since 2013. Bilingual French-English and self-taught web developer, I am constantly improving my knowledge about the latest web technologies. I fully commit myself to my projects and aim to be proud of what I build. I am **currently looking for a front-end web developer position in Switzerland.**

Education

2010 – 2014

Bachelor of Arts in Information Systems

University of Fribourg

2003 – 2008

Maturité fédérale

Collège du Sud, Bulle

Languages

Bilingual French / English

German: good knowledge

Spanish: basic knowledge

Experiences

2015 – June 2019

Web developer @ macmac AG, Marly

Hired as a web developer in a small team of five people, I acquired a lot of experience in full stack development. Our projects were mostly client websites built around a CMS (WordPress, Kirby, Prismic...) and more recently with javascript frameworks (Vue.js, Nuxt.js). I became very knowledgeable with styling and layouts with CSS, avoiding crossbrowser issues and assuring mobile and SEO-friendly websites. I was also responsible for developing ecommerce projects, with WooCommerce or Shopify.

As the sole developer at the agency as of the end of 2017, I was responsible for all our online projects. Free to use whatever tools I wanted, I chose to learn Vue deeply, then added Nuxt. I'm very interested in learning more about React and PWAs.

2016 – Today

Freelance developer

I have been freelancing on the side for small client projects.

Design

- Sketch
- Photoshop

CMS

- WordPress
- Kirby
