Internet enthousiast, I have been building websites since 2013. Bilingual French-English and self-taught mostly thanks to online tutorials, I am constantly improving my knowledge and I fully commit to my projects, looking to be proud of what I build. My goal is to continue gain more expertise in the frontend world by working on interesting projects, both visually and functionality-wise.

Education

2010 – 2014

Bachelor of Arts in Information Systems

University of Fribourg

2003 – 2008

Maturité fédérale

Collège du Sud, Bulle

Language skills

Bilingual French/English

German: good knowledge

Spanish: basic knowledge

Online resources

Podcast fanatic

Courses such as frontendmasters, Wes Bos, Level Up Tuts, Udemy and many others.

Professional experience

Sept – Nov 2019

Frontend dev / WordPress @ CDI digital, Fribourg

I worked together with .NET developers on the frontend side of projects: WordPress, legacy projects Sitefinity/Telerik and a Vue.js project.

2015 – 2019

Web dev @ macmac SA, Marly

I learned a lot about how to build websites, from start to finish. Our projects were mainly websites built around a CMS or small SPAs with JS frameworks (Vue, Nuxt). I was the only developer on most of the projects: using the given designs, I was responsible to choose the tech stacks and build the websites based on the client's needs. I learned how to create interesting responsive layouts, animations and interactivity, all while keeping an eye on performance, crossbrowser issues and SEO. I also built a couple eCommerce websites with WooCommerce and Shopify.

2016 – Today

Freelancing

I've been freelancing a bit for small projects for a couple years now.
