

Thomas Miller

Frontend Web developer

 thomasmiller.ch

Internet enthousiast, I have been building websites since 2013. Bilingual FR-EN and self-taught with online courses, I am constantly improving my frontend knowledge. I fully commit to my projects, looking to be proud of what I build at the end of the day. My goal is to continue gain more expertise in the frontend world by working on interesting projects, both visually and functionality-wise.

Experience

Fullstack Developer
925 Interactive Sàrl · Villeneuve
Sept 2020 · Today

Joined the web agency 925, specialized in building websites with WordPress. Mainly maintenance of existing websites, with many Woocommerce e-shops. Developed custom WordPress plugins using Vue.js.

Frontend Developer
CDI digital · Fribourg
Sept 2019 · Nov 2019

I worked together with .NET developers on the frontend side of projects: WordPress, legacy projects Sitefinity + Telerik, an ecommerce Kindle website and a Vue.js project.

Web Developer
macmac sa · Marly
July 2015 · Aug 2019

Built many client websites, from start to finish. Our projects were mainly visually pleasing websites and e-shops built around a CMS, or SPAs with JS frameworks (Vue.js).

I learned a lot about layouts, tech stack choices, animations, interactivity, ecommerce, all while keeping an eye on performance, crossbrowser issues and SEO. I worked closely with the designer, the clients and other developers on very various projects.

Freelancing
New projects, maintenance & consulting
Since 2019 · Today

Accepting freelance projects as a side-gig, building new projects and maintaining older online websites. Working together with other freelancers and many different clients.

Education

Bachelor of Arts
