> Internet enthousiast, I have been building websites since 2013. Bilingual French-English and self-taught mostly thanks to online tutorials, I am constantly improving my knowledge and I fully commit to my projects, looking to be proud of what I build. My goal is to continue gain more expertise in the frontend world by working on interesting projects, both visually and functionality-wise.

Education

2010 – 2014
Bachelor of Arts in Information Systems
University of Fribourg

2003 – 2008
Maturité fédérale
Collège du Sud, Bulle

Language skills

Bilingual French/English
German: good knowledge
Spanish: basic knowledge

Online resources

Podcast fanatic, frontendmasters, Wes Bos, Level Up Tuts, Udemy and many others.

Professional experience

Dec 2019 – Today
Freelancing
I've been building and maintaining web projects as a freelancer, until I find my next new job position.

Sept – Nov 2019
Frontend dev / WordPress @ CDI digital, Fribourg
I worked together with .NET developers on the frontend side of projects: WordPress, legacy projects Sitefinity + Telerik, an ecommerce Kindle website and a Vue.js project.

2015 – 2019
Web dev @ macmac SA, Marly
I learned a lot about how to build websites, from start to finish. Our projects were mainly visually pleasing websites built around a CMS, or SPAs with JS frameworks (Vue.js).

I learned a lot about layouts, tech stack choices, animations, interactivity, ecommerce, all while keeping an eye on performance, crossbrowser issues and SEO. I worked closely with the designer, the clients and other developers on many very different projects.

Coding

Javascript (ES6+)
HTML / CSS
PHP
Animations
Git
Crossbrowser
Responsive

Tools

Vue.js
Nuxt.js
Greensock
jQuery
npm
Webpack
Gulp

CMS

WordPress
Kirby
Prismic
Woocommerce
Shopify

Design

Sketch
Photoshop
Webflow
